Re: Dale Kermociev

Metro Safety Rail Inc.

To Whom it May Concern,

I know and have worked with Dale for about 20 years and am very familiar with the safety solution for high rise construction that he was offering.

In the past 10 years I have also seen the design changes and improvements to the now patented, engineered system that makes this a great solution to address safety, ease of use and functionality in the construction process.

We will continue to work together on the horizontal safety life line for tilt up and precast construction.

I would not hesitate to recommend Dale and the Metro Safety solution, if you have any questions please do not hesitate to reach out.

Sincerely,

Alvin Unger
