To Whom It May Concern,

Re: Letter of Reference

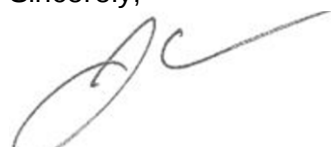

I am writing this letter to recommend the use of Metro Safety Rail's 3 in 1 safety system. We worked with Dale on our PCL project in Saskatoon.

At each stage Metro Safety Rail made themselves available to ensure that all our questions and concerns were addressed. The rail system arrived on time and organized in steel racks. We found the solution easy to install and fit into our construction process without any issues or delays. Once installed the system allowed our team to work freely and effectively in a safe environment.

The rail system was cost effective and allowed flexibility of use without the need of additional safety or fall arrest products.

If you have any questions, please don't hesitate to contact me.

Sincerely,

Jamie Lesperance, GSC
